

CMA PRODUCT IMPROVEMENT

Effective Date: MAY 2016
Log Number: CMA-PI-469
Subject: DISH RACK SUPPORT BAR
Model Affected: EST-66

Dish Rack Support Bar

This CMA Product Improvement ensures smooth operation of our EST-66 conveyors when washing heavy cast iron Fajita and steak serving platters or thick, heavy china plates. The Dish Rack Support Bar prevents the plastic dish racks from bowing and flexing under heavy weight conditions, causing the jamming of the conveyor dogs and impeding the movement of the dish rack through the conveyor. The retro-fit kit is P/N: 13906.50 and comes with templates for drilling and notching the mounting holes and slots.
