

CMA's Model "B" Energy Saver

Uses As Little As

.97

Gallons of Water Per Rack!

SPECIAL NOTICE: The Model B double rack dishmachine has been replaced by the "NEW" Energy Star Model B. The unique changes made to this product to meet Energy Star ratings are: New sprayarms, bearings, pan, manifolds, and spraybases. The "NEW" Energy Star Model B offers advantages of using less energy, less water and less chemicals that provide superior performance and excellent results.

CMA will continue to carry replacement parts to support the standard Model B. When ordering replacement parts, please specify whether they are for the standard Model B or the NEW Energy Star Model B dishmachine.

FEATURES AND FACTS:

- 80 racks / 320 covers per hour.
- Economical to operate. Uses .96 gallons of water per rack.
- All stainless steel construction assures long life and years of trouble free operation.
- Unique spray arm system features upper and lower stainless steel wash arms with reinforced end caps. Specially designed pull-pins allow wash arms to be easily removed for cleaning.
- Pump purging system improves results by eliminating soil and chemical carryover during rinse cycle.
- Top mounted controls include built-in chemical pumps and deliming system that assures proper chemical usage.
- Auto start/stop makes operation safe and easy.
- Integrated scrap accumulator prevents food soil from entering drain system.
- Water inlet includes built-in strainer, prevents debris from clogging the water valve.
- Dishmachine includes 2 dishracks.
- Stainless steel impeller is standard.
- Optional stainless steel scrap accumulator.
