

CHANGE NOTICE

Effective Date: DECEMBER 1, 2011
Log Number: CN-04-433
Subject: MOV's PN 13012.29
Model Affected: EST44/66 CONVEYORS

MOV's

To maintain and balance voltage consistency to the various low voltage controls within the electrical system in EST-44/66 Conveyors, CMA has added MOV's (an electronic filter) to each of the motor and heater contactors. In addition, the conveyor timer relay has had an internal built-in MOV. This improvement to the Conveyor electrical system will provide added component protection in different areas of North America that experience voltage inconsistencies.
