

CMA PRODUCT IMPROVEMENT

Effective Date: August, 2014
Log Number: CN-453
Subject: NEW FEATURES ON MODEL L-1C
Models Affected: L-1C GLASSWASHER

New Features on the L-1C Chemical Sanitizing Glasswasher

At customer request, CMA has programmed the L-1C to function as the sister machines L-1X and L-1X16. This change improves the cycle to 2m per cycle which **increases from 20 racks/hr to 30 racks/hr**. The L-1C machine will have a band heater. Our new L-1C is a very quiet behind the bar **built with unique features to reduce noise**. The double wall construction and **“NST” (noise suppression technology)** makes this model the perfect choice for behind the bar applications. The wash pump has a stainless steel closed impeller that suppresses the noise and provides high-end sanitizing of glassware, that other glasswashers do not offer.

Removable panels for easy access service
