Also Available as Straight or Corner

Booster Heater

Model B (Double)
Also Available as Corner B

Is your Low Temp dishmachine lacking an adequate supply of hot water to assure proper sanitation is taking place? No room for 220V in the electrical panel? We have the answer - "CMA TEMP-SURE HOT WATER ASSURANCE". Rather than replace your existing water heater with something larger and more expensive, add the "TEMP-SURE HOT WATER ASSURANCE" booster heater to your machine. The "TEMP-SURE HOT WATER ASSURANCE" is placed next to the dishmachine, not requiring any of your valuable kitchen space. The "TEMP-SURE HOT WATER ASSURANCE" provides an additional 25 degrees of temperature rise to your incoming dishmachine water supply.

Available on most CMA dishmachines.

The "TEMP-SURE HOT WATER ASSURANCE" can be built-in at the factory, or it can be purchased separately with a field kit for field installation.

CMA HOT WATER™

Hot Water Assurance System
For Dump And Fill Style
Dishwashers

WARNINGS:

- Plumbing connections must be made by a qualified service company who will comply with all available Federal, State, and Local Health, Plumbing and Safety codes.
- CMA recommends utilizing a water softening system to maintain water hardness measurements of 3.5 gpg (grains per gallon) or less. This will assure maximum results and optimum operation of the dishwasher.

The CMA -Temp-Sure™ option assures a continuous supply of hot water resulting in excellent dish machine performance. The heater is custom-designed for dump and fill CMA dishwashers as a factory added option or an infield add-on. The heater will also fit most competitor's single tank dishmachines.

Advisory: CMA does NOT endorse "Tankless On-Demand" water heaters for use on CMA Dishmachine products. CMA DOES endorse, and highly recommends, the standard "tank" style water heaters, sized properly to handle each particular facility with their water heating requirements. Not for sale in Ontario Canada.
